Title of Data Manual Water Level Data for EWDP Phase II Wells

Description of Data Excel spreadsheet of manual water level measurements collected at all Phase II wells. Each well is on a tab (sheet) with the spreadsheet.

Data Collection Method Periodic manual water levels taken with electric sounders, recorded to nearest 0.1'.

Data Location(s) Amargosa Valley, Early Warning Drilling Program wells - Phase II; NC-EWDP-2DB, 3DB, 4PA, 4PB, 5SB, 7S, 12D, 12PA, 12PB, 12PC, 15D, 19D, 19P.

Data Collection Period(s) 1/9/00 - 11/15/00

Data Source(s) Field measurements of depth to water, YMP/M&O GPS derived location and elevation surveys, well head measurements with engineers steel tape, conversions from feet to meters and calculated water elevations using MS Excel.

Data Censuring Wells NC-EWDP-3DB, 12D, 15D do not have water level data available as these wells are not complete.

Data Processing Conversions and arithmetic calculations.

Data Limitations Data in this submittal includes data on first occurrence of water during drilling and subsequent measurements through the drill steel as the borehole was progressed. Drilling conditions during these measurements are included in the comments column. Water levels collected during drilling may be affected by perched water, drilling fluids and other factors. Depth to water measurements taken after well development have no data limitations. Measurements taken by the U.S. Geological Survey using electric sounders are included.
