.....  
**Title of Data** 'First Water' Chemical Analyses Reported by Desert Research Institute, Water Resource Center, in February 1999 to GMII for EWDP I Water Samples (hydrogeochemistry)

.....  
**Description of Data** An MS Excel file (dri1392.xls) contains site names, sampling dates, sampling depths, gross chemical parameters, trace elements, tritium, DRI-WRC sample IDs, and GMII sample IDs. This file supersedes the original excel files "drimetals.xls" and "rid1392b.xls".

.....  
**Data Collection Method** Water samples were collected by bailing through the drill string with disposable slim or fat high density polyethylene (HDPE) bailers, filtered (see note on spreadsheet), labeled in field, and shipped to laboratory from office.

**Data Location(s)** Nye County Early Warning Drilling Program well sites NC-EWDP-01s, -01dx, -09sx, -02d, and -03d at the specified depths (which correspond to water levels at the time).

.....  
**Data Collection Period(s)** 12/12/98 to 1/27/99

.....  
**Data Source(s)** Original laboratory analyses in RID 1392 and GMII field geochemistry notebook.

.....  
**Data Censuring** None

.....  
**Data Processing** Laboratory performed data reduction; data compiled into spreadsheet for distribution by D.L. Shettel of GMII. Note that laboratory mislabeled any sample originally labeled [containing] "-9SX-" as "-95X-".

.....  
**Data Limitations** These water samples are "first water of occurrence" and as such may not be representative of later produced or production water samples.

.....  
**Governing QA Docs.** TP-8.1
