Title of Data		NC-EWDP-2DB Phase II Geophysical Log (Caliper, E-Logs, Temp.)						
Description of Data		Hard and electronic copy of geophysical log data from EWDP II well 2DB. The electronic files are: 2dbele10.las, 2dbfcal.las and 2dbtempl.las {log ascii files}. The first file is an E-Log suite 2550 to 2780 ft. The second file is a caliper log 2655 to 2814 ft., and the third is a temperature log (250 to 2780 ft.) in degrees Celsius.						
Data Collection Method		Data Logging of E-Logs, Caliper and Temperature						
Data Location(s)		EWDP-2DB						
Data Collection Period(s)		10/19/00						
Data Source(s)		NC-EWDP-2DB well site						
Data Censoring								
Data Processing		Refer to ASTM D - 5753-95						
Data Limitations		Log ascii standard (.las) files require well log software for analysis. A depth control datum was incorrectly applied during the advancement of the borehole NC-EWDP-2DB from 503 to 3075 ft covering the period 07/13/2000 to 10/20/2000. All depth information for this portion of the borehole has a consistent +1.35 foot error. The error was originally identified and documented in memo dated 10/24/2000 (RID 4725). Subsequently, the borehole was re-entered in February 2002. The correct datum was used for these operations. See memo dated 3/4/2002 (RID 4964). No data (depths) have been changed on any documentation or on samples. This metadata is intended to notify users of data from borehole/well NC-EWDP-2DB that all depths recorded for the interval 503 to 3075 feet are in error by +1.35 ft.
