

# NYE County NWRPO -Technical Data Report

RID No.	Transmitter	Org.	Receiver	Org.	Key word1	Title/Description
3763	Downing	NYE	Qarc	NYE	1S	Ewdp-1s Water Elevation And Temperature Data From Westbay Instruments, 8/4/00 To 12/6/00
Doc. Date	12/12/2000	General Doc. Type	QA PROGRAM DOC	Keyword2	MON	
Entry Date	12/14/2000	Detailed Doc. Type	DATA	Keyword3	WATER	
Data Originator	Reina Downing					
Preparer						
Title of Data	EWDP-1S WESTBAY DATA, 8/4/00 TO 12/6/00					
Description of Data	One floppy disk containing a zipped file, EWDP-1S.zip, with excel file: 120600_1SQA.xls. This file contains water elevation and temperature data from 8/400 to 12/6/00 collected at Phase I EWDP-1S Westbay instrumented well.					
Data Collection Method	Westbay Moxdax pressure and temperature probes					
Data Location(s)	EWDP-1S					
Data Collection Period(s)	8/4/00 to 12/6/00					
Data Source(s)	Westbay datalogger & instrumented well					
Data Censuring						
Data Processing	Refer to NWRPO Technical Procedure 9.2					
Data Limitations	EWDP-1S Westbay data limitations (data collection period 8/4/00 to 12/6/00)					
<p>The following text contains additional information necessary for interpretation of the attached EWDP water elevation and temperature data. Listed are the activities and particular environments associated with the well and instrumentation. Time frames are listed for each activity. Certain activities, such as equipment testing or water sampling, may have an impact on the data.</p> <p>EWDP-1S: There are two downhole Westbay monitoring probes at this well. Probe 1 is located at 167.6 ft. below ground surface and Probe 2 is located at 228.2 ft. below ground surface. Each probe is located in a separate packed off zone.</p> <p>8/11/00 Probe 2 starts showing a drop in water level which continues until 11/17/00. To date, this response has not been definitively defined. It is possible that this probe is responding to seismic activity in the area or that the probe is malfunctioning. An October downhole calibration was postponed to allow the probe to return to steady state. However, it continues to reflect a drop in water elevation. This data is suspect at this point. For further details and description, contact Reina Downing at the NWRPO.</p> <p>11/17/00 Lost power to the Mosdax datalogger and data was not collected until 12/6/00.</p>						
Governing QA Docs.	TP 9.2					
Frequency of Transmittal	Once per quarter
