Title of Data
Ur, Sr, S and Pb Isotopic Analyses from Geochron Laboratories in July 1999 for EWDP I Water Samples (hydrogeochemistry)

Description of Data
An MS Excel file (GL1378.xls) containing site name, sampling date, GMII sample ID, laboratory ID, pump depth, sample depth and analytical data (stable sulfur isotopic ratios, lead isotope ratios, uranium isotope ratios and strontium isotope ratios).

Data Collection Method
Samples were collected unfiltered from the discharge line of a down hole Bennett pump (after at least 3 well bore volumes of fluid discharged) into 1 liter HDPE bottles, labeled in field, and shipped to laboratory from office.

Data Location(s)
Nye County Early Warning Drilling Program wells NC-EWDP-1S, -9SX, -3S, -1DX and -3D at specified depths.

Data Collection Period(s)
2/17/99 to 5/24/99

Data Source(s)
Original Geochron Lab analyses and GMII field geochemistry notebook. Original analyses are contained in RID 1378 (Sulfur, Uranium and Strontium) and RID 1398 (Uranium and Lead isotopic ratios).

Data Censuring
None

Data Processing
Data reduction performed by laboratory; data compiled into MS Excel spreadsheet by D.L. Shettel / GMII.

Data Limitations
Samples from screened interval of piezometer well or the sampling port located within the packed off interval of a Westbay completed well. Uncertainty on stable isotopic ratio analyses (SIRA) are plus/minus 0.1 per mil (o/oo).

Governing QA Docs.
TP-8.1

Frequency of Transmittal
