Title of Data	Sulfur Isotopic Analyses Reported by Geochron Laboratories on March 9, 2000 to GMII for EWDP I Water Samples (hydrogeochemistry)
Description of Data	An MS Excel file (GL1704.xls) contains site names, sampling dates, sulfur stable isotopic ratio analyses (SIRA) and any duplicates, laboratory sample IDs, GMII sample IDs, sample and pump depths.
Data Collection Method	Unfiltered formation water samples were collected from the discharge line of a down hole Bennett pump (after at least 3 well bore volumes of fluid discharged) into pre-rinsed 1L high density polyethylene (HDPE) bottles, bottles labeled in field, and shipped to laboratory from office.
Data Location(s)	Nye County (NV) Early Warning Drilling Program well sites NC-EWDP-01s, -09sx, and -03s at specified depths.
Data Collection Period(s)	11/8/99 to 11/15/99
Data Source(s)	Original laboratory analyses in RID 1704 and GMII field geochemistry notebook.
Data Censuring	None
Data Processing	Laboratory performed data reduction; data compiled into spreadsheet for distribution by D. Shettel of GMII.
Data Limitations	Sample depths are for packed off intervals (with sampling ports in between) of Westbay completions. Error on SIRA measurements is +/- 0.1 per mil (o/oo), except for hydrogen.
Governing QA Docs.	TP-8.1
Frequency of Transmittal	As required by PI
