Title of Data	Strontium Isotopic Ratios Reported by Geochron Laboratories on July 14, 2000 to GMII for EWDP spring 2000 water sampling (hydrogeochemistry)					
Description of Data	An MS Excel file (GL3345.xls) contains site names, sampling dates, Sr isotopic ratios, laboratory sample IDs, GMII sample IDs, sample depths, and pump depths.					
Data Collection Method	Water was pumped to surface with a down hole pump (Bennett pump for EWDP wells, electric turbine pump for other wells) and collected (after at least 3 well bore volumes of fluid discharged) in a pre-rinsed 1L high density polyethylene (HDPE) bottle after filtering through a 0.45 micron large capacity Geotech "dispos-a-filter," bottle was labeled in field and shipped to laboratory from office.					
Data Location(s)	Nye County Early Warning Drilling Program wells NC-EWDP-01s, -03s, -09sx, -01dx, -04pa, -04pb, -05sb, -12pa, -12pb, -12pc, -15p, -19d, -19p, and the McCracken well (west Amargosa Valley) at specified sampling depths.					
Data Collection Period(s)	5/13/00 to 6/19/00					
Data Source(s)	Original laboratory analyses in RID 3345 and GMII field sampling notebook.					
Data Censuring	None					
Data Processing	Laboratory performed data reduction; data compiled into spreadsheet for distribution by D.L. Shettel of GMII. Laboratory lists sample "N000522-12pa" but it was actually our sample "Y000522-12pa."					
Data Limitations	Sampling intervals correspond to screened intervals of piezometer wells, or the packed off intervals (with sampling port in between) of Westbay completions. Analytical limitations specified on spreadsheet (GL3345.xls) under "NOTES:".
