Title of Data	Major Anion, Cation and Selected Trace Element Analyses Reported by Desert Research Institute on December 8, 1999 to GMII for EWDP I Water Samples (hydrogeochemistry)					
Description of Data	An MS Excel file (dri1709.xls) contains site name, sampling date, sampling interval, analytical results for analytes, laboratory sample IDs, and GMII sample IDs. Note that laboratory has incorrectly labeled samples 991108-01s2-2, 991109-09s-03, and 991115-03s-01 as 91108-01s2-2, 91109-09s-03, 991115-035-01, respectively.					
Data Collection Method	Water samples were pumped to the surface with a down hole Bennett pump until at least 3 well bore volumes were discharged; samples were collected in 500 mL high density polyethylene bottles after filtration through a 0.45 micron filter, labeled in the field, and sent to laboratory from the office.					
Data Location(s)	Nye County Early Warning Drill Program sites NC-EWDP-01s, -03s, and -09sx from specified depths.					
Data Collection Period(s)	11/8/99 to 11/15/99					
Data Source(s)	Original laboratory analyses in RID 1709 and GMII field geochemistry notebook.					
Data Censuring	None					
Data Processing	Laboratory performed data reduction; data compiled into spreadsheet for distribution by D.L. Shettel of GMII.					
Data Limitations	Water samples are post development purged ones from the screened interval of piezometer wells, or the packed off intervals (with sampling port in between) of Westbay completions.					
Governing QA Docs.	TP-8.1					
Frequency of Transmittal	As required by PI
