Title of Data	Major Anion, Cation and Selected Trace Element Analyses Reported by Desert Research Institute on April 5, 1999 to GMII for a Water Sample from EWDP-3D (hydrogeochemistry)
Description of Data	An MS Excel file (dri1468.xls) contains well name, sampling date, sampling depth, analyte concentrations, laboratory sample IDs, and GMII sample IDs
Data Collection Method	Water was pumped to the surface during a spinner test, most samples were filtered through a 0.45 micron filter, collected in 125 mL and 1 liter containers, labeled in field and shipped to laboratory from office.
Data Location(s)	Nye County well site NC-EWDP-03d at specified depth.
Data Collection Period(s)	2/17/1999
Data Source(s)	Original laboratory analyses in RID 1468 and GMII field geochemistry notebook.
Data Censuring	None
Data Processing	Laboratory performed data reduction; data compiled into spreadsheet for distribution by D.L. Shettel of GMII.
Data Limitations	Samples may represent mixtures of water from different producing horizons. Negative values are indicative of below detection limit analyses (detection limit is absolute numeric value).
Governing QA Docs.	TP-8.1
Frequency of Transmittal	As required by PI
