

# NYE County NWRPO -Technical Data Report

RID No.	Transmitter	Org.	Receiver	Org.	Key word1	Title/Description
4868	Shettel	GMII	Qarc	NYE	EWDP I	Major Anion, Cation And Selected Trace Element Analyses Reported By Desert Research Institute-water Resource Center On June 4, 1999 To Gmii For Ewdp I Water Samples (hydrogeochemistry)
Doc. Date	6/4/1999	General Doc. Type	QA PROGRAM DOC	Keyword2	H2O	
Entry Date	3/7/2002	Detailed Doc. Type	DATA	Keyword3	ANALYSES	
Data Originator Preparer	Jim Heidker					
Title of Data	Major Anion, Cation and Selected Trace Element Analyses Reported by Desert Research Institute-Water Resource Center on June 4, 1999 to GMII for EWDP Water Samples (hydrogeochemistry)					
Description of Data	An MS Excel file (dri1470.xls) contains site names, sampling dates, sampling intervals, analytes, laboratory sample IDs, GMII sample IDs, and pump depths (except for bailed sample).					
Data Collection Method	One sample was bailed to the surface. Other waters were pumped to surface by a down hole Bennett pump (after at least 3 well bore volumes of fluid discharged), collected from the discharge line, filtered through a 0.45 large capacity filter into pre-rinsed high density polyethylene (HDPE) bottles, labeled in the field, and shipped to laboratory from office.					
Data Location(s)	Nye County Early Warning Drilling Program well sites NC-EWDP-1S, -1DX, -3S, and -3D at specified depths.					
Data Collection Period(s)	2/17/99 to 5/24/99					
Data Source(s)	Original laboratory analyses in RID 1470 and GMII field geochemistry notebook.					
Data Censuring	None					
Data Processing	Laboratory performed data reduction; data was compiled into spreadsheet for distribution by D.L. Shettel of GMII.					
Data Limitations	Bailed water samples may not be representative of later produced water from completed well. Sampling intervals correspond to screened lengths of piezometer wells, or the packed off interval (with sampling port in between) of Westbay completions. Negative analysis values are indicative of below detection limit analysis (the absolute numeric value).					
Governing QA Docs.	TP-8.1					
Frequency of Transmittal	As required by PI					
Direct Questions About Data To-	Reina Downing
